

SQ2

1. The magnitude of a vector refers to its _____.
 - a. direction
 - b. position
 - c. size
 - d. Angle
2. The angle of a vector shows its _____.
 - a. direction
 - b. position
 - c. size
 - d. Angle
3. The graphical method requires the use of _____.
 - a. formulas
 - b. rulers and protractors
 - c. calculators
 - d. Computers
4. The unit of force is _____.
 - a. meter
 - b. second
 - c. newton
 - d. Kilogram
5. What happens if vectors point in opposite directions?
 - a. they multiply
 - b. they cancel or subtract
 - c. they double
 - d. they curve
6. When two equal forces act in opposite directions, the result is _____.
 - a. maximum force
 - b. zero
 - c. doubled force
 - d. curved motion
7. Direction must be considered when working with?
 - a. scalars
 - b. numbers
 - c. vectors
 - d. Units
8. Which method uses equations to solve vectors?
 - a. graphical method
 - b. polygon method
 - c. diagram method
 - d. component method
9. The result of adding vectors using components involves resolving into _____.
 - a. angle
 - b. x and y components
 - c. magnitudes
 - d. time and speed
10. What happens if vectors point in the same direction?
 - a. they add up
 - b. they cancel
 - c. they subtract
 - d. they rotate
11. A vector quantity has both _____ and _____.
 - a. speed & time
 - b. magnitude & direction
 - c. distance & time
 - d. force & mass
12. In the tip-to-tail method, vectors are arranged?
 - a. side by side
 - b. tip to tip
 - c. tail to tip
 - d. Randomly
13. Weight is calculated using the formula?
 - a. $W = m + g$
 - b. $W = m/g$
 - c. $W = mg$
 - d. $W = g/m$
14. What is the weight if the mass is 65 kg? ($g = 9.8 \text{ m/s}^2$)
 - a. 500 N
 - b. 637.65 N
 - c. 650 N
 - d. 700 N

SQ2

15. What is the weight of a 20 kg object?
- a. 196.2 N
 - b. 200.4 N
 - c. 180.3 N
 - d. 150.5 N

Answer Key:

- 1. c
- 2. a
- 3. b
- 4. c
- 5. b
- 6. b
- 7. c
- 8. d
- 9. b
- 10. a
- 11. b
- 12. c
- 13. c
- 14. b
- 15. a
