Subtopic 2

Communication Principles and Ethics

Ethics in Communication

Prepared by:
Maica Regina M. Escosio

Plagiarism

Plagiarism

- “the act of presenting the words, ideas, or images of another as your own”
- “Whether deliberate or unintentional, plagiarism violates ethical standards in scholarship”

American Psychological Association (2022)

Technology Driven by Innovation

Plagiarism

Types:

- 1) Global plagiarism - occurs when you claim the entirety of another person's work as your own
- 2) Verbatim plagiarism - failing to use quotation marks and a citation when copying another's words
- 3) Paraphrasing plagiarism - making it appear that someone else's idea is yours

Rongione (2024)

Plagiarism

Types:

- 4) Patchwork plagiarism - making use of parts of different texts and passing them off as yours
- 5) Self-plagiarism - using your previous work without proper citation

Rongione (2024)

Distorting Visuals or Numbers

Lie Factor

- A concept introduced by Edward Tufte
- The amount that a graphic representation exaggerates data

Misrepresentation in Visual Communication

Lie Factor

- 1 is the recommended lie factor

$$\text{Lie Factor} = \frac{\text{Size of the effect in the visual}}{\text{Size of the effect in the data}}$$

De Boer (2021)

Misrepresentation in Visual Communication

Poldrack (2022)

Touching Up Graphics

- Digital manipulations
- Standards are set on allowable digital manipulations

Touching Up Graphics

What is Image Manipulation?

What are the Implications?

- Impacts research integrity, deemed misconduct
- Affects reproducibility of the findings
- Paper retraction, damaged reputation, etc.

Chandran (2022)

Graphics and Logical Fallacies

Graphics and Logical Fallacies

Some logical fallacies when creating graphics and how to avoid them

- 1) Hasty generalizations - understand your audience; look past stereotypes
- 2) False cause - avoid using design elements to imply associations or relationships; use your design to accurately depict associations

LinkedIn (n.d.)

Graphics and Logical Fallacies

- 3) Appeal to emotion - make sure that your design delivers accurate, logical information instead of just triggering emotions
- 4) Bandwagon effect - “critically evaluate design trends and consider whether they align with your project’s goals”

LinkedIn (n.d.)

Graphics and Logical Fallacies

5) Slippery slope - this fallacy suggests that an action can lead to a series of consequences, towards a negative outcome; ensure that your design enables the audience to be critical and to derive their own conclusions

LinkedIn (n.d.)

Graphics and Logical Fallacies

6) Straw man - in graphic design, this could mean “oversimplifying or exaggerating competing products or views to make them appear weaker”; have your design represent all sides of an argument correctly and fairly

LinkedIn (n.d.)

Protection of Confidential Information VS Invasion of Privacy

RA 10173 Data Privacy Act of 2012

- Signed into law on August 15, 2012
- “An act protecting individual personal information in information and communications systems in the government and the private sector, creating for this purpose a national privacy commission, and for other purposes”

(Data Privacy Act, 2012)

RA 10173 Data Privacy Act of 2012

- “The processing of personal information shall be allowed, subject to compliance with the requirements of this Act and other laws allowing disclosure of information to the public and adherence to the **principles of transparency, legitimate purpose and proportionality.**”

(Data Privacy Act, 2012)

Principle of Transparency

“The data subject must be aware of the nature, purpose, and extent of the processing of his or her personal data, including the risks and safeguards involved, the identity of personal information controller, his or her rights as a data subject, and how these can be exercised. Any information and communication relating to the processing of personal data should be easy to access and understand, using clear and plain language.”

(National Privacy Commission, 2016)

Principle of Legitimate Purpose

“The processing of information shall be compatible with a declared and specified purpose which must not be contrary to law, morals, or public policy.”

(National Privacy Commission, 2016)

Principle of Proportionality

“The processing of information shall be adequate, relevant, suitable, necessary, and not excessive in relation to a declared and specified purpose. Personal data shall be processed only if the purpose of the processing could not reasonably be fulfilled by other means.”

(National Privacy Commission, 2016)

Some important terms

Personal information - “refers to any information, whether recorded in a material form or not, from which the identity of an individual is apparent or can be reasonably and directly ascertained by the entity holding the information, or when put together with other information would directly and certainly identify an individual”

(National Privacy Commission, 2016)

Some important terms

Personal information controller - “a natural or juridical person, or any other body who controls the processing of personal data, or instructs another to process personal data on its behalf.”

(National Privacy Commission, 2016)

Rule VI. Security Measures for the Protection of Personal Data

“Personal information controllers and personal information processors shall implement reasonable and appropriate organizational, physical, and technical security measures for the protection of personal data.”

(National Privacy Commission, 2016)

Rule VI. Security Measures for the Protection of Personal Data

“The personal information controller and personal information processor shall take steps to ensure that any natural person acting under their authority and who has access to personal data, does not process them except upon their instructions, or as required by law.”

(National Privacy Commission, 2016)

Invasion of Privacy

- The law guarantees our right to privacy
- Someone may be guilty of invasion of privacy under civil or criminal law if they post, without consent, others' private pictures or information

(Respicio & Co., 2023)

Invasion of Privacy

- Unauthorized processing or accessing or disclosure of personal and sensitive personal information shall be penalized by imprisonment ranging from 1 to 6 years and a fine of Php 500,000 to Php 2,000,000

(Data Privacy Act, 2012)

Invasion of Privacy

- Unconsented disclosure of sensitive personal information to a third party by a personal information controller shall be subject to imprisonment of 3-5 years and a fine of Php 500,000-2,000,000

(Data Privacy Act, 2012)

Invasion of Privacy

- If the offender is a corporation, the responsible officers shall be the ones to receive the penalty
- “The maximum penalty...shall be imposed when the personal data of at least one hundred (100) persons are harmed, affected, or involved...”

(Data Privacy Act, 2012)
